

Custom Report Cards in Centre

The Custom Report Card module replaces Centre's default report card with a school-personalized, custom-designed report card that will ensure Centre's top-notch grading system is perfect for your school or district.

Grades that began in Centre's teacher gradebook are "printed" directly onto a custom-designed PDF report card. Your school or district can design the report card in-house, or Glenn Abbey can design one to your specifications.

The add-on Report Card module works just like the Report Card program in your installation of Centre. You search for any number of students (every fifth grader, every IEP student, every student failing a course, everyone in Mrs. Jones' third hour class, etc) and a printable PDF document is downloaded automatically to your computer. The Report Card program is available to administrative users (such as sys admins, guidance counselors, and secretaries) and can be made available to teachers. Teachers, of course would be allowed to print Report Cards for only their students.
